

Buckeye Central Schools - Facial Coverings (Masks) Guidelines 2021-2022

Building:

We strongly recommend facial coverings (masks) to be worn in the building this upcoming school year (2021-2022), yet are allowing this decision to be made by each family and staff member. As a consideration, local, state, and federal health agencies are consistently recommending facial coverings and strongly indicating that unvaccinated individuals wear facial coverings while inside. While encouraging facial coverings, we support each family in making the appropriate health decision for their family and student(s). As always, thanks for your understanding and support in this important area.

Buses:

The CDC Order continues to **REQUIRE** that masks be worn on all public transportation, including school buses operated by public and private school systems. Due to this federal Order, students and staff will be required to wear a facial covering (masks) on all of our buses both to and from school. This regulation also pertains to any athletic contest, fine arts activity, field trip, etc. which requires bus transportation.
